

SONOCO

PLASTIC CARTRIDGES

Flexibility and reliability for the ultimate in merchandising appeal

As the only company using extrusion and spin-welded technology in its rigid plastic cartridges, Sonoco gives customers a choice of wall thicknesses and different nozzle options. Our unique manufacturing process lets us offer a wide range of nozzle colors letting you match the nozzle to the color of the caulk inside the package. This gives your product a major retail advantage.

Available in pint and quart size designs and your choice of wall thickness, our full line of rigid plastic cartridges and components helps create the ideal total package for your product. With plants in Hanover, Pa., and Winchester, Ky., Sonoco can easily meet your high demand. Our full-wrap, full-field, seven-color printing capabilities give you a cartridge with high-resolution graphics and maximum self appeal.

Sonoco is also the only

supplier that can provide customers with rigid plastic cartridges as well as squeeze tubes to round out their product line. And our long history in packaging, combined with our continuous investment in capacity and technology, give our customers a reliable partner to grow with for years to come.

All the component flexibility you need from a single source

Sonoco designs and manufactures a full line of plastic and metal components designed specifically

for our rigid plastic cartridges to customize your package to the product, consumer preference and retail requirements. It also ensures a proper fit between a cartridge and its components. The result is a cost-effective total package tailored to your unique cartridge needs.

SONOCO
