

# Sonoco Adhesives

A specialized supplier of adhesive solutions for paper-based packaging

**Sonoco is a custom formulator of water-based polymer, polyvinyl alcohol (PVOH)/clay, dextrin adhesives and hot melts.** We offer you an alternative to large volume commodity adhesives. Our team of experts supplies experience and technical knowledge in formulating adhesives, paperboard chemistry and paperboard converting, providing you with total cost reductions and the highest quality adhesives available.

**Sonoco Adhesives is a global supplier,** providing adhesive solutions for some of the world's leading brands.

## Applications

- Tubes and cores
- Composite cans
- Reels
- Bag manufacturing
- Header/ream/roll wrap
- Laminating
- Air filtration
- Case and carton sealing
- Labeling
- Box manufacturing – joint and glue lap
- Point-of-purchase and displays
- Product assembly

*Right, Research and Development Chemist Gregory Lesley utilizes the latest technology to formulate a customized adhesive mixture. Our industry-leading capabilities allow us to supply on a global scale while still providing customer-specific adhesive solutions.*

*Below, with over 100 years of experience, our hot melt expertise includes both standard and pressure-sensitive applications. We offer you peace of mind by saving you money and providing innovative products consisting of the highest quality materials.*

#### **Sonoco's value-added adhesive technology**

- Dry blend products for logistically hard-to-reach geographic areas
- Custom formulation to optimize performance by balancing yield, scrap, speed and dimensional stability
- Packaging adhesives designed specifically to meet your processing needs
- Over 100 years of paperboard and adhesive chemistry expertise to produce the highest quality products

#### **Custom formulated products**

- Over 150 adhesive products
- More than 100 developmental products
- A variety of dry blend products

#### **Packaging capabilities**

- Tanker truck—large quantities
- Totes—offer single totes
- Drums—offer single drums/prefer two-drum minimum
- Dry blends—50-pound bags or 1,000 bulk bags
- Hot melts – drums, boxes and bags
