

# FlatStack® Recycled Paperboard Sheets

Flat out give you  
more, with less.

Made from 100% recycled fibers and completely recyclable, FlatStack paperboard sheets are a cost-effective solution that protects products on pallets during shipping, storage and retail display.

## Protect your products by using FlatStack sheets as:

- Top covers on pallets
- Liners on pallets
- Tier sheets between product layers to improve pallet cube integrity

## Features:

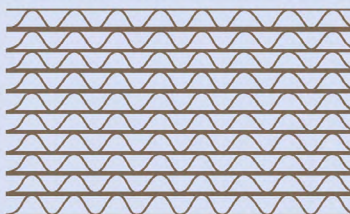

- Calipers: 17–45pt
- Design flexibility: square, round or custom corners and/or sizes
- Custom die-cut designs available

## Sustainability:

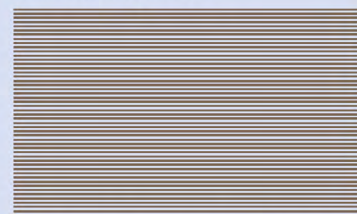

- Made with 100% recycled fiber
- Minimum 85% post-consumer fibers
- Acceptable in commercial OCC recycling programs
- FlatStack grades are available as chain-of-custody certified to any of the three fiber certification programs

# FlatStack® Ultralight Tier Sheets

As a value-priced alternative to lightweight gypsum and paperboard sheets, FlatStack Ultralight tier sheets deliver exceptional performance, consistency in quality, and security of supply.

**Save money and space switching from corrugate to FlatStack tier sheets.**

Caliper	Sheets per pallet	Pallets per truckload	Sheets per truckload
Corrugate C-Flute 150pt	320	56	17,920
Corrugate B-Flute 120pt	400	56	22,400
FlatStack 24pt	2,000	21	42,000
FlatStack 30pt	1,600	21	33,600

Assuming 40"W x 48"L x 48"H

**Locations across North America ensure quick and efficient delivery**

## Benefits:

- Engineered for consistent performance on automated palletizers
- Engineered and manufactured specifically for this application
- Technical support for implementation, including process modeling
- Made from raw materials and easily recycled.

Caliper	Sheets per pallet	Sheets per truckload
17pt	2,800	61,600
18pt	2,700	59,400

Assuming 40"W x 48"L sheet size, 22 pallets per truckload
