

### **What is Okta and why do I have to log into it before I got to certain Sonoco applications?**

Okta is an on-demand service that allows you to easily sign-in to all applications via a single logon. Once you sign in, your Okta home page displays all the applications available to you through this method in one location. Simply click the application icon and each application will launch in a new browser window or tab. For more information on how to use Okta, click [here](#).
