

# Material Recovery Facility

In an effort to meet the growing demand for recycling, Sonoco Recycling operates several state-of-the-art material recovery facilities (MRFs) serving municipalities throughout the Carolinas and Virginia. Sonoco's MRFs process a wide variety of materials.

Most of these materials are consumed at Sonoco paper mills to create products consumers use every day-making Sonoco one of the few closed-loop packaging suppliers in the industry.

Our MRF operations not only employ hundreds of Carolinians, but they also feature the latest technological advancements to ensure maximum recovery and quality of recyclable commodities.

## Materials Accepted

- Paper
- Plastic containers free of contamination
- Steel and aluminum cans
- Glass containers
- Corrugated

## Equipment

- Advanced recycling technology and latest-generation equipment
- Robotics and AI
- State-of-the-art baling equipment
- Optical scanners
- Glass breakers and cleaning systems

## Customized Solutions

- Automated web-reporting capabilities
- Brokerage services
- One-source recycling solutions
- Wide geographic area

## A Recycling Partner You Can Count On

Commercial • Industrial • Residential  
Municipal • Governmental
