

SONOCO PAPER PARTITIONS

sonoco.com

We REALIZE

The most important thing to you
is what's **INSIDE** your box.

The most important thing to
us is **protecting** it.

Our customers have consistently rated us as providing

WORLD CLASS

customer satisfaction on independent surveys.

STRONG SUPPLY CHAIN

As a global paper and packaging group, our 10 locations
offer integrated and efficient service.

REDUCE, RE-USE, RECYCLE

By using recycled paper, Sonoco conserves the equivalent of
over 500,000 cubic yards of landfill space per year.

We specialize in the design and manufacturing of fiber partitions,
corrugated partitions, sheeted paperboard products, folding cartons
and die-cut paperboard components.

CUSTOM PARTITIONS AND PROTECTIVE PACKAGING

Solid Fiber Partitions

Fiber partitions are ideal for packages when top and bottom compression strength is needed and the products must be prevented from touching. Our fiber partitions will ensure that your product arrives at its destination safely and without damage. Available in short and tall heights.

Corrugated Partitions

Our corrugated manufacturing process does not require costly cutting dies, allowing for greater flexibility while providing high-quality, competitively priced, conventional partitions, comparable to steel rule die-cut partitions.

Die-Cut Components

With web-fed and sheet-fed die cutting capabilities, we are in a position to deliver tailor-made solutions to specific product requirements. No application is too challenging for our team to address.

Tier Sheets

Made with uncoated recycled board, our tier sheets are available in a variety of calipers. Ideal for separating bulk amounts of product or for layering the bottom of pallets to reduce exposure to dirt and moisture. Tier sheets are made from 100% recycled fibers and completely recyclable.

Pads, Sheets and Trays

We produce sheeted paperboard products in calipers ranging from single-ply to heavy-duty multi-ply. We focus on applications requiring special features such as perforations, scores, corner cuts and other custom needs.

Proprietary Paperboards

Rocksolid®
CaseMate®
Wineguard®
UltraGuardian™

MARKETS SERVED

Glass and Beverage

With more than 50 years of experience, Sonoco offers unparalleled knowledge and experience in the glass and beverage packaging industry. Our innovative solutions help protect your product and facilitate automation for glass re-shippers and end-users.

Food Packaging

We produce a wide variety of packaging for the food industry. Products include cake collars, syrup and jelly trays, layer pads for meat and poultry, die-cuts for ice cream cones and neck collars or "jar gaskets."

Automotive and Electronic

With vast experience in producing custom inner packaging for automotive electronic components and plastic injection molded products, we know how to protect the integrity of your product.

Pharmaceutical and Cosmetic

Our steel-rule, die-cutting capabilities ensure a clean, dust-free partition, pad or die-cut insert. We utilize a wide range of materials, including SBS white virgin board and UltraGuardian™ recycled board, to prevent scuffing and abrasion. With our state-of-the-art equipment and ability to assemble by machine or hand, we can manufacture multi-cell partitions in any size, even small enough to hold a perfume vial.

Agriculture Packaging

Our agricultural products are made for applications that require superior protection and enhanced ventilation during storage and have demanding shipping requirements, such as exportation. Our goal is to make sure your product arrives as fresh upon delivery as when shipped. Products include our CitrusSaver® System, ProducSaver® ventilated pads and other interior packaging products.

PRODUCTION FACILITIES

Sonoco has a uniform presence of production capabilities throughout the Western Hemisphere: a scale unparalleled in the industry.
