

Cores Built to Carry the Load

Plastic Tubes and Cores

Every core is built to last with world-class tolerance, smooth surfaces and exact specifications. Easily wind, dispense and protect your application against heat, moisture, dust or other environmental factors. At Sonoco, you'll find a broad range of dimensionally stable, plastic cores developed to precise length, wall thickness, winding and converting requirements.

We manufacture to ISO standards using a variety of materials available at numerous plant locations. Choose among a variety of materials such as PP, HDPE, HIPS, ABS or let us assist you in identifying the best material for your project or application. Expect quality and integrity from production to placement. No product variations, fallouts or poor start-up performance.

Talk to us about your plastic packaging needs today!

Benefits

- ▶ **Reduces** – end of roll, telescoping and other common defects.
- ▶ **Clean Room Ready** – Smooth surface prevents fragments/particles from contaminating product(s)
- ▶ **Durable** – Available in high-impact and chemically resistant resins
- ▶ **Waterproof** – Allows for a variety of storage, transportation and environmental requirements
- ▶ **Sustainable** – Engineered for reuse in a wide variety of applications
- ▶ **Recycle Ready** – Manufactured from materials that are widely-recyclable. Previously recycled resin is also available as a base material

**Check with local municipalities for recycling specifications.*
